Wood is a great ally of cozy lighting. It is a material that is hard to mold, a challenge that the Ginger collection neatly resolves. The combination of sheets of wood and paper pressed together under high pressure achieves a laminate that appears almost entirely flat.

**For mounted canopy installation**

Take into account the total power in watts, the power of the driver, and the wire entry points of the canopy. The total wattage of the selected lamps elements cannot exceed the max wattage of the canopy's driver. Therefore, you must choose your canopy/driver by the power required. Finally, the number of lamps installed in a single canopy cannot exceed the number of wire entry points of that canopy.

Canopy 100W/ Circular	19

Black electrical cord

This system makes it possible to connect several suspension lamps into a single point of light, offering the absolute freedom to build with light. The Cluster accessory helps to illuminate large spaces or create compositions with the Dipping Light collection or the Ginger 20 model.

### How Ginger illuminates
